

Background

This is the second part to the Connection module. Please refer to Connection part one first.

What happens next?

A notification will be issued to the DNO and they will confirm receipt of the documents via a notification. Once confirmation has been received, the connection can proceed, as agreed.

If the ICP is carrying out the closing joint, once the connection has been made, the ICP are required within a maximum of 5 days of the connection, for each live closing joint to upload the following completion documentation:

- The as-laid drawings (jointers sketch) associated with the closing joint works
- Associated electrical test results

For a live jointing site, in addition, the ICP is required to upload:

- Asset-04-015 appendix 2(a) completion certificates

Once the contestable connection project has been determined to be completed, the next step is 'Project Closure'.

Project Closure

Once the final connection has been made, and all works have been completed, the last step in the process is to send all of the required documentation to the DNO to close the project and request closure.

- Click PROJECT CLOSURE
- Click the required Project No

- Upload the required documents by clicking 
- Navigate to your document and double click it

- Click 
- Repeat the steps to upload as many documents as required

- Click 

What happens next?

A notification will be issued to the DNO. The DNO will review the information and then close down the project if the information is complete. The project will then be archived at an appropriate time.
