Merseyside
& North Wales*

0845 272 2424

Case Study: Requirement for Flame Retardant, Personnel Protective Equipment

The above image highlights the serious consequences of contact with a high voltage cable; the operative concerned was not wearing flame retardant coveralls. The task for the operative was to excavate for the installation of lamp posts for a local authority, utility records on site were of a consultancy multi utility nature at not at an interpretable scale. The operative came into contact with the high voltage cable in the footpath with a compressor gun at a depth of 600mm, unfortunately on this occasion the operative was hospitalised with serious burns to his legs and head. Prior to undertaking excavations it is essential that the correct personal protective equipment required to undertake the task is supplied and utilised.

Personal Protective Equipment (PPE) Is The Last Line In Defence. Prior To Carrying Out Excavations, Plan the Project
