

EXPLANATORY NOTE

Denny to Wishaw Network Upgrade (DWNO) Reinforcement Project

The DWNO Project consists of 3 separate applications under section 37 of the Electricity Act 1989 and an application under the Town and Country Planning (Scotland) Act 1997 (as amended) for the Cumbernauld Substation Extension to North Lanarkshire Council.

The Project has been subject to Environmental Impact Assessment (EIA) and a single EIA Report has been produced to accompany the applications for consent to the Energy Consents Unit and North Lanarkshire Council.

The following Applications have been made to the ECU:

1. WB Route 400kV OHL (Application Reference ECU00006380)
2. XX and XR Upgrading from 275kV to 400kV (Application Reference ECU00006382)
3. ZG Upgrading from 275kV to 400kV (Application Reference ECU00006375)

A copy of the EIA report has been uploaded as part of the WB Route Application and all documents relating to the three applications above can be viewed at ECU00006380.

Alternatively, a copy of the EIA Report is available to download from the SPEN website at the following web address:
