Dear Ms. Lisa Smith,

Planning Application Reference no. 26/00718/FUL

Proposed Extension of Cumbernauld Substation

Location: Cumbernauld Electricity Substation, Forest Road, Abronhill, Cumbernauld, North Lanarkshire.

Following submission of the above planning application, SPEN write to provide an addendum to the submitted EIA Report, Volume 3 – Appendix 10.1 – Cumbernauld Substation Phase 1 Geoenvironmental and Geotechnical Report.

Page no. 3 of Volume 3 – Appendix 10.1 - Cumbernauld Substation Phase 1 – Geoenvironmental and Geotechnical Report of the EIA Report, detailed permanent works were to include a diesel generator and storage of up to 90,000 litres of insulating oil.

SPEN confirm the diesel generator is an existing piece of plant on site and in turn is not proposed. In addition, the storage of up to 90,000 litres of insulating oil is no longer proposed.

Should you wish to discuss the above, please feel free to contact me.

Yours sincerely,

Redacted
