

Open Data Monthly Report

September 2025

Highlights & Useful Links

September Highlights

- The Open Data Portal welcomed **130 new registered users** this month, recorded **78,000 API calls**, and enabled **4,400 data downloads**.
- We received **11 Data Requests, completing 8 within an average of 5 days** – ahead of our 7-day benchmark. The remaining requests are progressing and remain on track to meet target.
- **GIS Shapefiles** remain the most frequently requested dataset, followed by **network asset data, network outage data, and network capacity data**.
- New developments in data this month include updated **Faults Data, now incorporating NaFIRS codes** for improved categorisation; a **new Network Flow: SP Boundaries dataset**, allowing you to see electricity flows across licence area boundaries; and an **upgraded SPT Heat Map** providing clearer future insights on network capacity. We've also added dedicated feature pages for the **Network Development Plan, Flexibility, and the enhanced Single Digital View**, making key datasets more accessible and easier to apply.
- We've launched a new **Learning Hub**, bringing together all supporting videos and materials into one place. We also **introduced a selection of How-To Guides** with step-by-step videos to support you in using the Portal.

Planned Developments

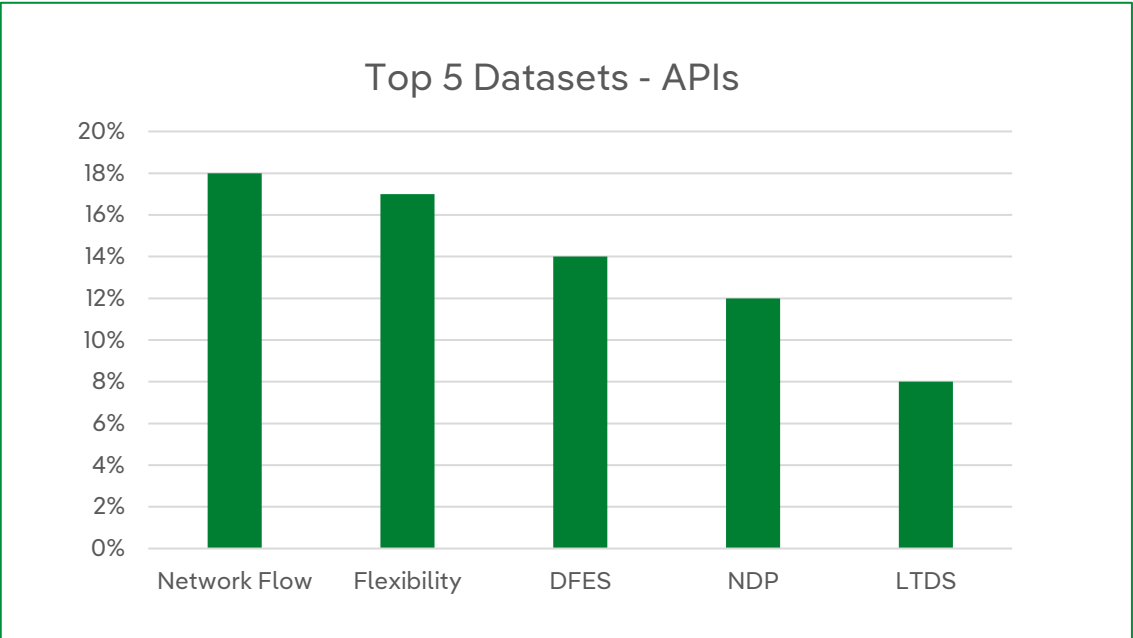

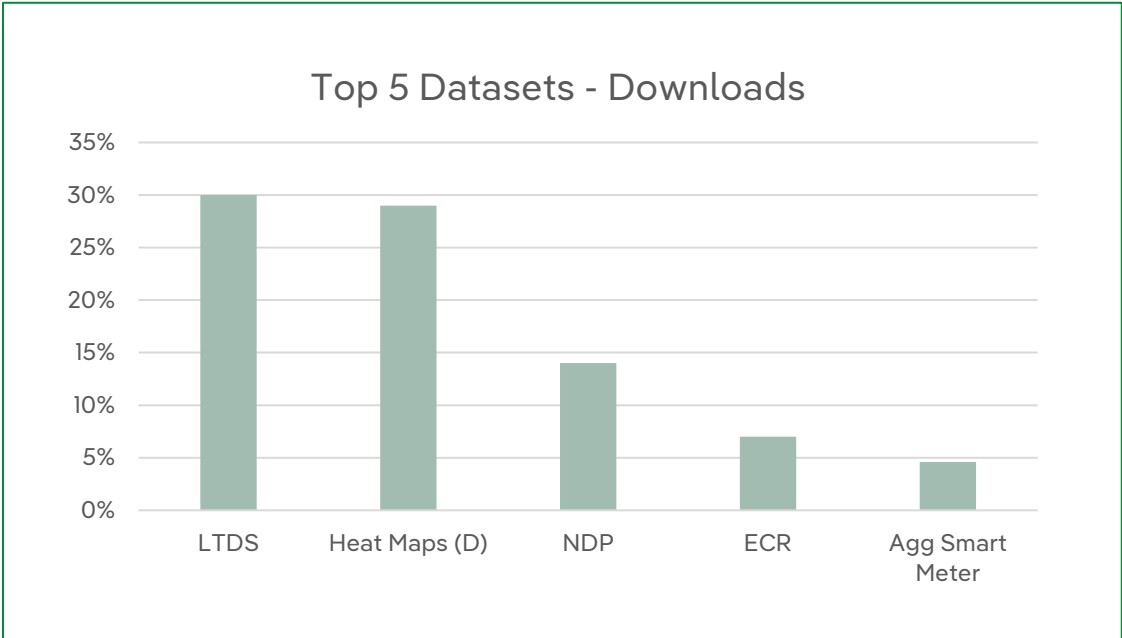

- Launch of the Recite Me accessibility toolbar on the Open Data Portal (Q4).
- New interactive dashboards showcasing our Distribution Network Options Assessment and Secondary Network Visibility (Q4).
- Our annual stakeholder survey, inviting your views and input to help shape future Portal developments and our 2026 Roadmap (Q4).
- Dataset publications for Q4 include:
 - Historic Feeder data
 - Capacity Management System data
 - Non-firm connection insights data

Full details of upcoming events and future developments can be found on our 2025 Roadmap, available via the Open Data Portal.
