

Policy & Guidance on Extension to Validity Periods of Connection or POC Offers

If a Customer is not ready to accept our offer, the Customer may make a request to extend the validity period of the offer. An extension may be granted depending on the circumstances. Please note that any extension is at the sole discretion of SP Energy Networks.

If SP Energy Networks agree to extend a Connection Offer, then the original Application Date of the Customer will be re-set. Therefore, for any Interactive Connection Applications, the Customer may lose their position in the Interactive Queue.

– Policy Guidelines

- SP Energy Networks may extend the validity period for a further 3 months from the original expiry date of the offer
- For any Interactive Connection Applications, the new Application date will become the day following the original expiry date
- SP Energy Networks will issue a letter to the Customer to confirm the new validity date and any conditions of the extension being granted
- Extension requests will only be considered if received by SP Energy Networks no more than 5 working days prior to the end of the Connection Offer validity period. N.B. No extensions will be granted if the offer has been deemed as interactive with another party(s)
- SP Energy Networks reserves the right to re-calculate the connection charge and re-evaluate timescales for connection milestones and works.
