My Location

Change to a different basemap

Click to toggle between dynamic coordinates and coordinates for a specific

Click to measure distances between locations

Click on coloured dots to see pop-up containing information about the planned investment

The image displays a web-based map interface for SP Energy Networks. At the top, a dark green header contains the company logo and the title "SP Energy Networks Investment Map". Below the header, a map of the Dumfries and Galloway region is shown, featuring several yellow circular markers representing investment projects. A popup window titled "Transmission Projects" is open over a specific project location. The popup includes the company logo, the project name "Dumfries & Galloway Strategic Reinforcement", and a "Description" section. The description text reads: "Welcome to the home of the Dumfries and Galloway Strategic Reinforcement Project. Since carrying out our first round of public consultation in summer 2015, the project has been revised. We are calling the revised project the Kendoon to Tongland 132kV...". At the bottom of the popup, there are two links: "More Info..." and "Zoom to". A grey arrow points from the "More Info..." link to the text block below the map.
